Hi, I'm Ishant Sigdel a passionate full-stack developer specializing in front-end and backend. I enjoy making useful and easy-to-use apps. Some of my projects include a real estate website called *GJkarobar*, a news portal, and a blogging system. I use tools like Python and Django to build strong and working systems. I'm always excited to learn more and create great things with technology.

Projects

Online Real-estate Agency

GJkarobar (Gharjagga Karobar) is a dynamic real estate agency dedicated to transforming the way people buy, sell, and rent properties. Acting as a reliable agent, It facilitate seamless real estate transactions for residential, commercial, and land properties. It's mission is to make real estate dealings digital, efficient, and hassle-free.

News Portal

This News Portal is a dynamic web application built with Python and Django, designed to deliver the latest news across various categories. It offers a user-friendly interface for readers to explore trending stories, breaking news, and indepth articles.

Blogging system

Our blogging system is a user-friendly platform designed for creating, sharing, and managing blogs with ease. It offers a seamless writing experience, and customizable features to enhance user engagement.
